

# THE NHS and ILECS Working Together

ILECS Limited has an established relationship with various NHS Trusts throughout the United Kingdom working in partnership on service contracts, lift modernisations, full lift replacements and in some areas taking the responsibility of full contract administration.

ILECS Limited has a proven record in saving the NHS trust capital outlay to allow these funds to be used for other projects and lift refurbishments.

ILECS understand the restrictions placed on the NHS trusts and are able to work with you to meet your expectations.

Our specifications take into consideration your time and budget constraints as well as the NHS HTMs (including fire regulations where applicable).

ILECS are a member of Construction Line and have met and exceeded all the qualification points required to be accepted by this accredited body.
